

## Email Designer

### Version 5.0-1999 Release Notes

#### Changes for version 5.0-1999

- It's now possible to override the email sending limits. The sending limits can be configured on the Settings panel.
- Added "Inter email send delay" option. This provides a way to insert a delay between each email send.

- Paragraph font-size variations - paragraphs can now have different font sizes within the paragraph.
- Bullet lists now allow the bullet to be the same color and size as the text.
- Fixed templates import to get more templates from the templates dialog.
- “Import Template” action now available from the file menu.
- Updated templates url to use Email Designer custom one.
